

The Operating System for Hospitals

The hospital, finally on one OS.

ZenoHosp is the operating system your hospital has been waiting for. Eight modules. One identity. Every workflow connected, from patient registration to GST filing.

About US

Zeno Hosp is built to solve one problem: hospitals are operationally broken.

Most hospitals today run on disconnected systems, HMS in one place, billing in another, inventory in spreadsheets, and critical decisions based on incomplete data. This leads to delays, revenue leakage, and constant dependency on manual processes.

Zeno Hosp changes that.

We are building a unified operating system that brings every part of a hospital, clinical, operational, and financial into one connected platform. From patient registration to discharge, from OT scheduling to inventory tracking, from billing to GST reporting everything works together, in real time.

Why we built this:

Zeno Hosp is not created in isolation.

The team behind Zeno Hosp has deep, hands-on experience working with hospitals – from infrastructure and OT setups to equipment and day-to-day operations. We've seen where hospitals lose time, where money leaks, and where systems fail.

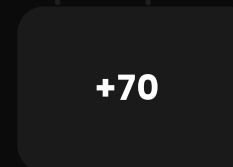

This product is built from that ground reality, not assumptions.

Our approach is simple:

- Eliminate operational chaos
- Give complete visibility
- Reduce dependency on manual processes
- Help hospitals scale with control

Zeno Hosp is not just software. It's the control system your hospital never had.

Our Clients

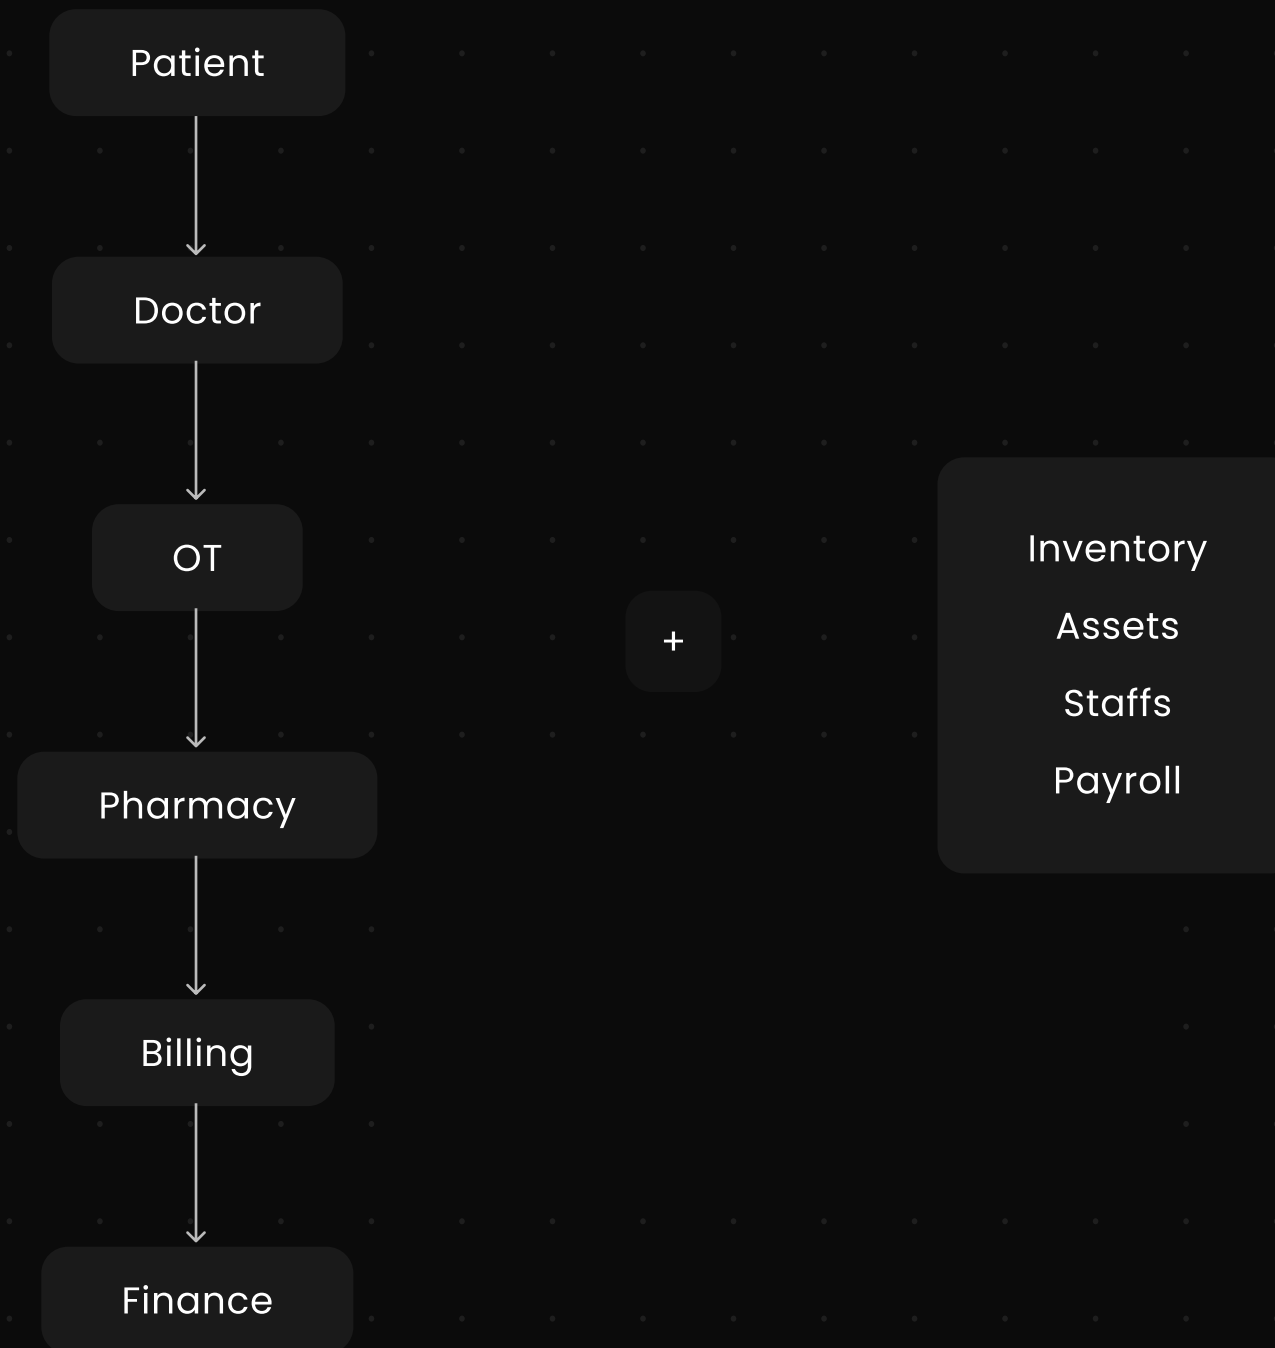

Hospitals are running on disconnected systems

- OPD in one system
- Billing in another
- Inventory in Excel
- OT on phone calls
- Finance in Tally

This is where money leaks.
This is where time is lost.

What if everything worked as one system?

The hospital, **finally on** one OS **ZenoHosp**

HMS

hms.zenohosp.com

- Patient Registration & UHID
- OPD Appointments & Queue
- Electronic Medical Record
- Digital Prescriptions
- Discharge Summary
- Doctor Profiles & Schedules
- Room & Bed Allocation
- Blood Bank & Radiology
- Telemedicine & Insurance
- Ambulance & Visitor Management

Inventory

HMS

One Platform. Zero Gaps.

From walk-in to discharge – every touchpoint managed in a single system built for Indian hospitals

Dashboard

Your hospital at a glance – patients, revenue, admissions, and doctor availability updated in real time.

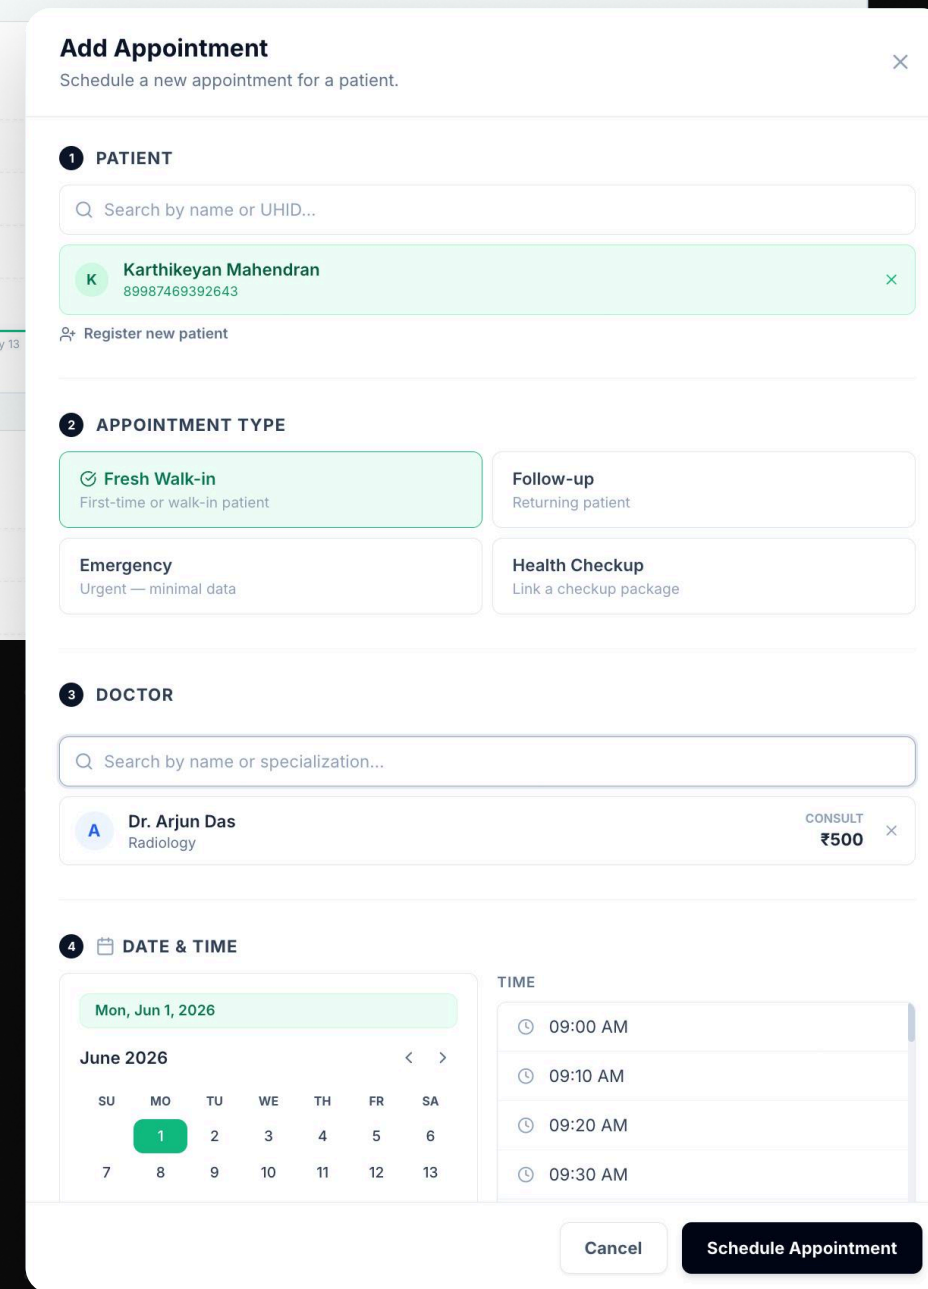

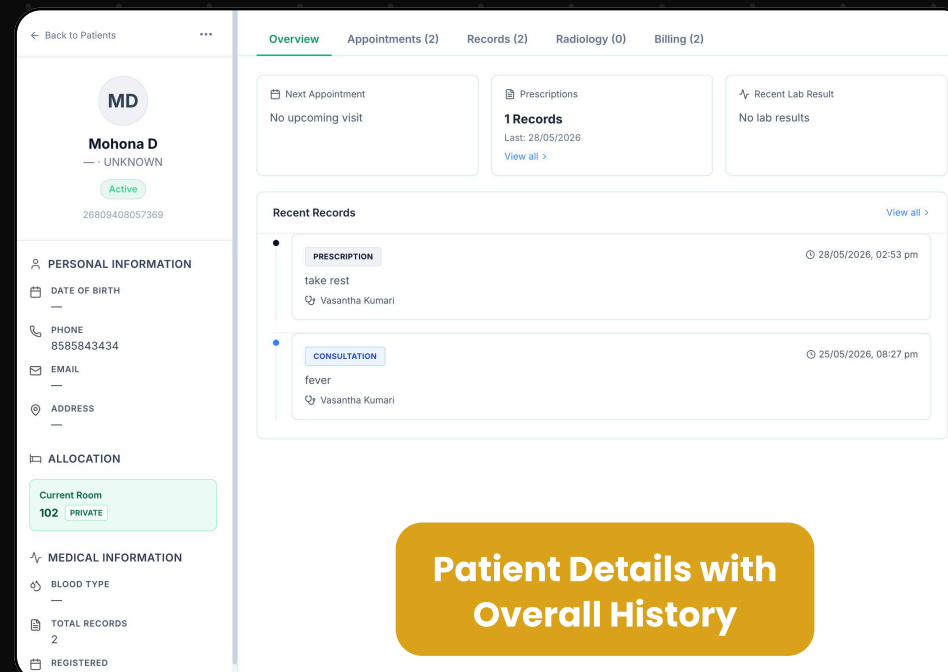

Patient Profile

Every patient. One record. From registration to room allocation, all history in one place.

Appointment Booking

Schedule in seconds. Search by patient, choose a doctor, pick a slot – done.

INVENTORY MANAGEMENT

One Inventory. Every Department.

From purchase order to last dispense – every stock movement, fully traceable

Every hospital runs on stock. ZenoHosp gives you a single inventory engine that powers your pharmacy, tracks your assets, and logs every dispense – with zero double entry.

Store Management

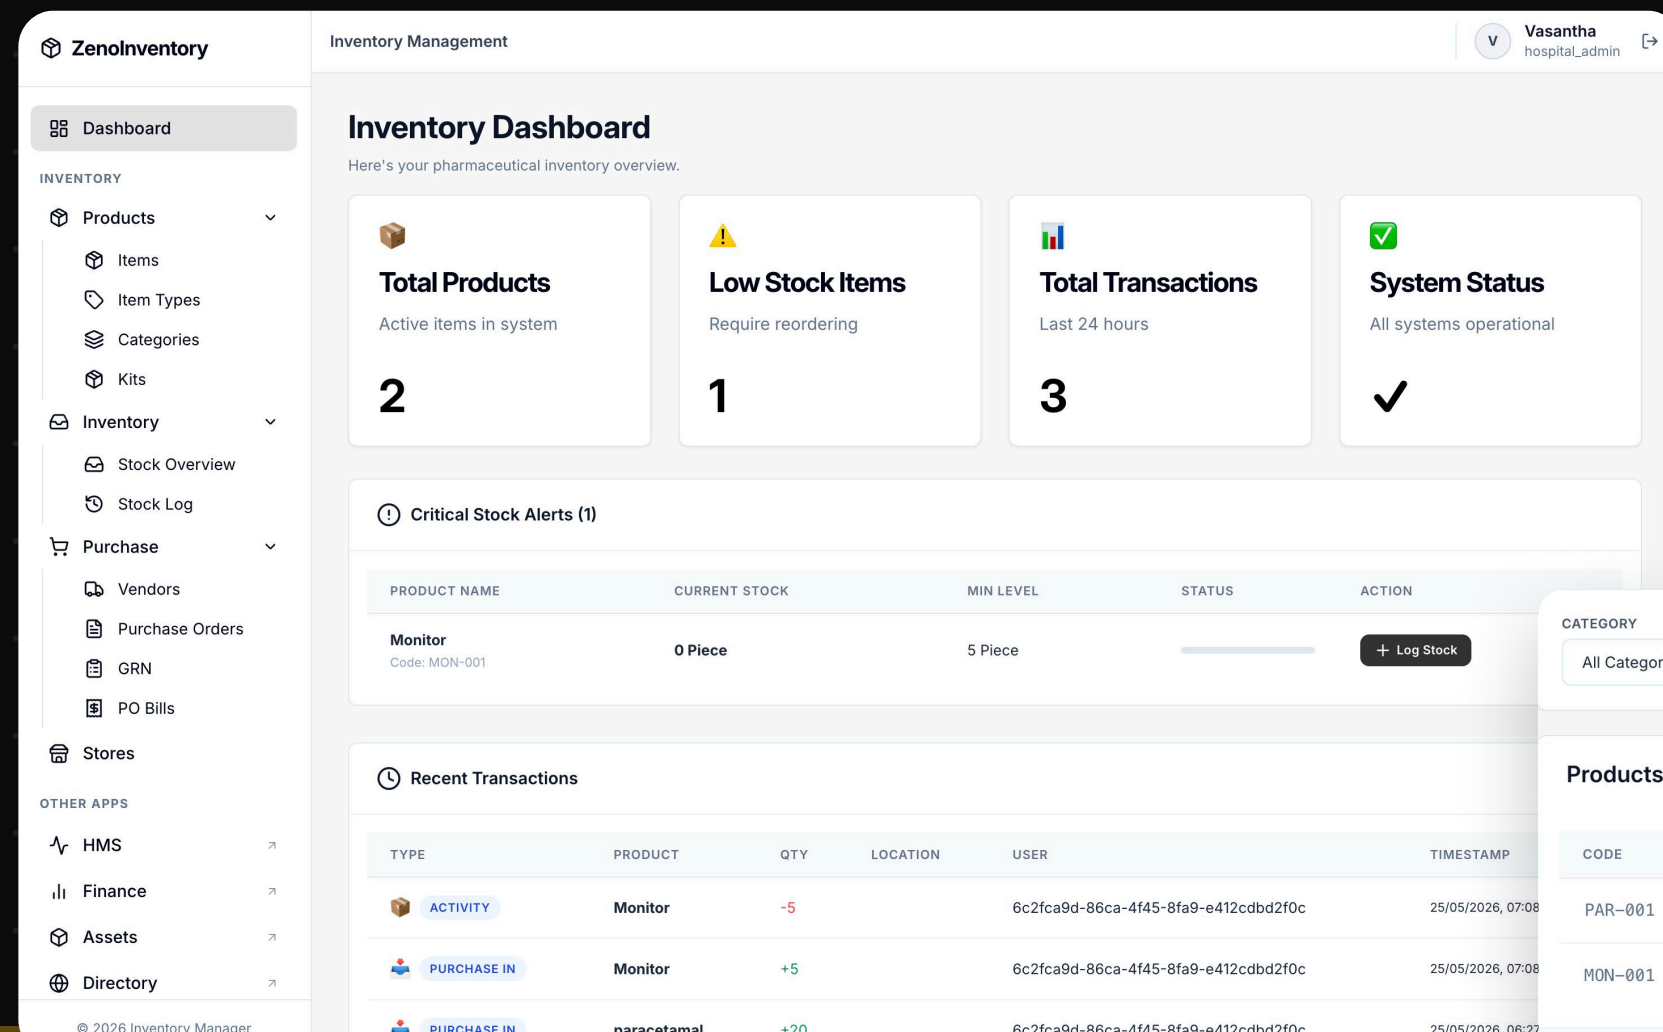

Create dedicated stores for each department – General Store, Pharmacy, OT Supplies, Housekeeping. Each store manages its own stock independently.

Purchase Management

Raise purchase orders, receive stock via GRN, manage vendors, and reconcile PO bills – full procurement cycle without leaving the system.

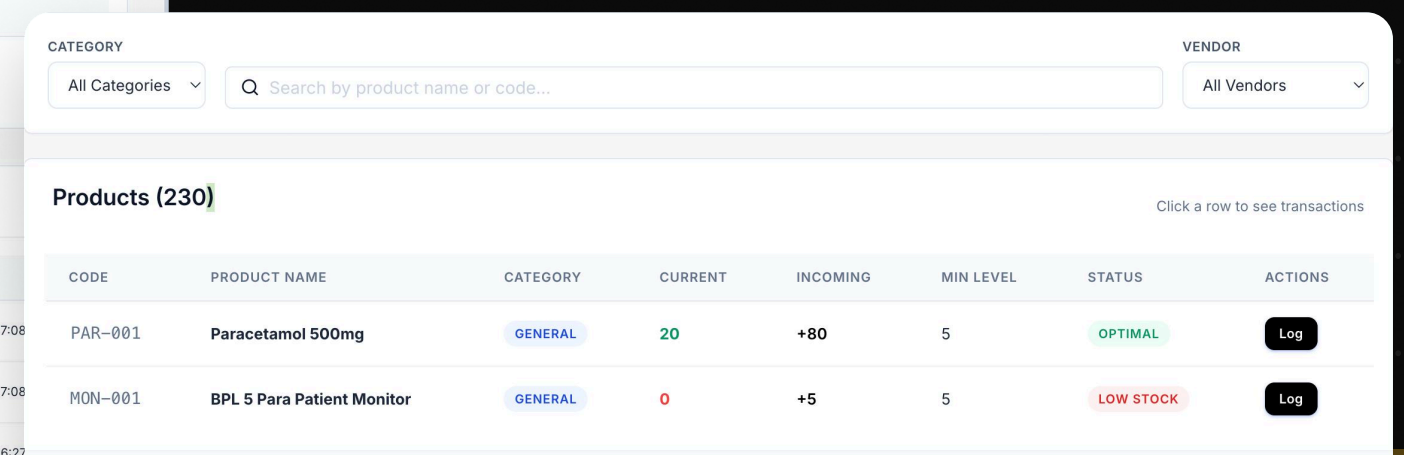

Smart Product Routing

Tag a product once.
Mark it as Pharmacy – it appears in pharmacy.zenohosp.com.
Mark it as Asset – it flows into asset.zenohosp.com.
 No manual sync. No duplication.

Stat Callouts

1. Real-time stock levels per store
2. Auto-routed to Pharmacy & Assets
3. Complete dispense audit trail
4. Low stock alerts before crisis hits

ASSETS MANAGEMENT

Know Where Every Asset Is. Always.

Real-time health and distribution metrics for every institutional asset – from ICU equipment to office furniture.

The image shows two overlapping forms from the Zenohosp system. The top form is titled "Record Asset Transfer" and includes a sub-header "Assign an asset to a user or location". It features a "Select Asset *" dropdown menu with a search bar, a "From" dropdown set to "Inventory", and a "To (Assignee) *" dropdown set to "Aarya Sharma". There is also a "Remarks" text area with the placeholder "Reason for transfer, conditions, etc...". The bottom form is titled "Log Maintenance / Repair" and includes an "Asset *" dropdown set to "Monitor (MON-003)", a "Service Type *" dropdown set to "Scheduled Maintenance", a "Date *" field set to "01/06/2026", a "Service Vendor" dropdown set to "In-house / Other", and a "Cost (₹)" field set to "0.00". Both forms have "Cancel" and "Save Record" buttons at the bottom.

Asset Inventory

Maintain a complete catalogue of every hospital asset – with category, vendor, purchase date, and current status. Every asset tagged, tracked, and accounted for.

Room & Department Allocation

Assign assets to rooms, departments, or individual staff. Know exactly where each asset is deployed and who is responsible for it.

Complete Asset History

Every event – purchase, allocation, maintenance, transfer – stacked into a single timeline per asset. Full traceability from day one.

AMC Management

Track Annual Maintenance Contracts per asset. Get visibility on contract periods, vendor commitments, and upcoming renewals – before they lapse.

Asset Transfers

Move assets between rooms, wards, or departments with a full transfer log. Every movement recorded with timestamp and authorized user.

Maintenance Logging

Log every maintenance event against an asset – scheduled or breakdown. Build a complete service history that tells you what was done, when, and by whom.

LAB & RADIOLOGY MANAGEMEN

Results Faster. Records Cleaner.

From doctor's order to final report – ZenoLab manages your entire diagnostic workflow, for both pathology and radiology, without a single paper form.

Test Queue Management

Lab tests ordered by doctors in HMS flow directly into the lab queue – no phone calls, no manual entry. Walk-in tests can also be added directly by lab staff. Everyone works from the same live list.

Radiology Workflow

Handle X-Ray, MRI, CT scan, and ultrasound requests end to end. Requests raised in HMS appear instantly in the radiology queue – assigned, processed, and reported from one place

Report Management

Upload, store, and manage patient reports digitally. Every report tagged to the patient's UHID – accessible instantly from their HMS profile at any time.

Seamless HMS Integration

Doctors see lab and radiology results directly inside the patient's record in HMS – no switching apps, no calling the lab. Results where they're needed, when they're needed.

PDF Reports

Generate clean, printable PDF reports for patients. Share digitally or print at the counter – formatted professionally with hospital branding.

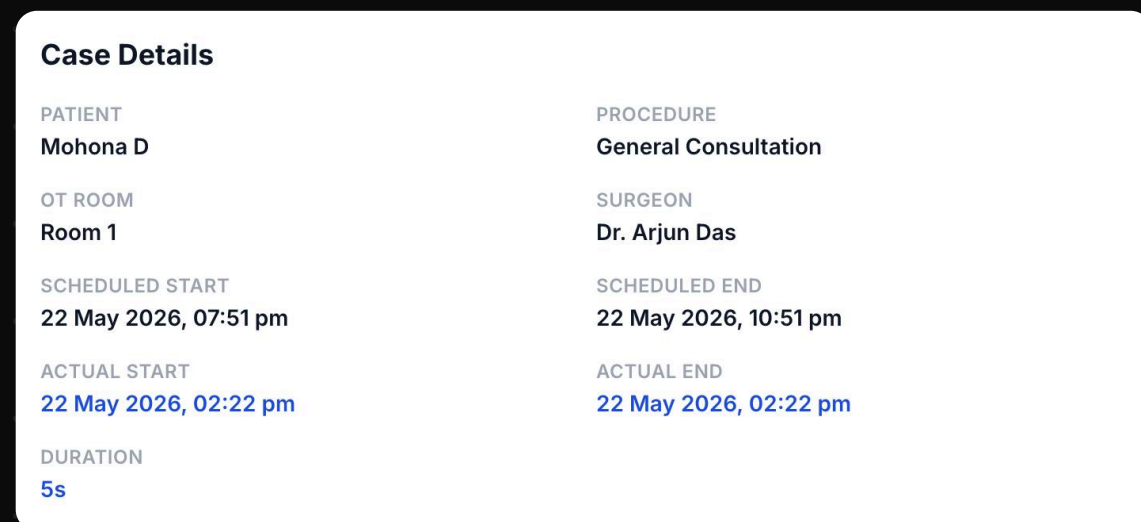

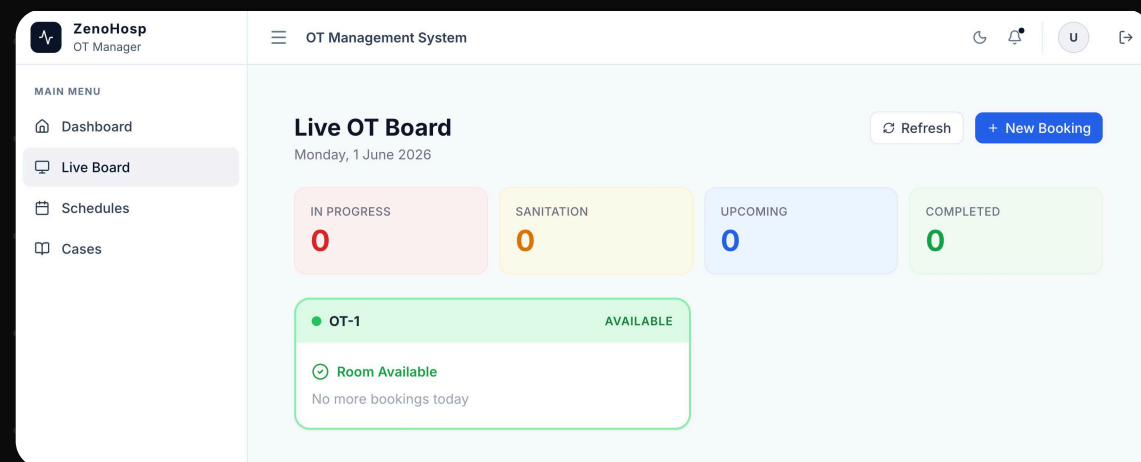

Complete Diagnostic History

Every test, every scan, every report – stacked chronologically per patient. A complete diagnostic timeline from day one, always available.

OT MANAGEMENT

Every Surgery. Perfectly Orchestrated.

From booking to billing – ZenoHosp manages the entire OT lifecycle so your surgical team can focus on the patient, not the paperwork.

OT Scheduling

Schedule surgeries across multiple OT rooms with assigned surgeons, procedures, and time slots. No double bookings. No room conflicts.

Live Board

Real-time view of every active OT – what's running, what's next, and what's pending. Every staff member stays in sync without a single phone call.

Case Status Tracking

Every case moves through a clear pipeline – Requested → Confirmed → In Progress → Sanitation → Completed. Nothing falls through the cracks.

Consumption Logging

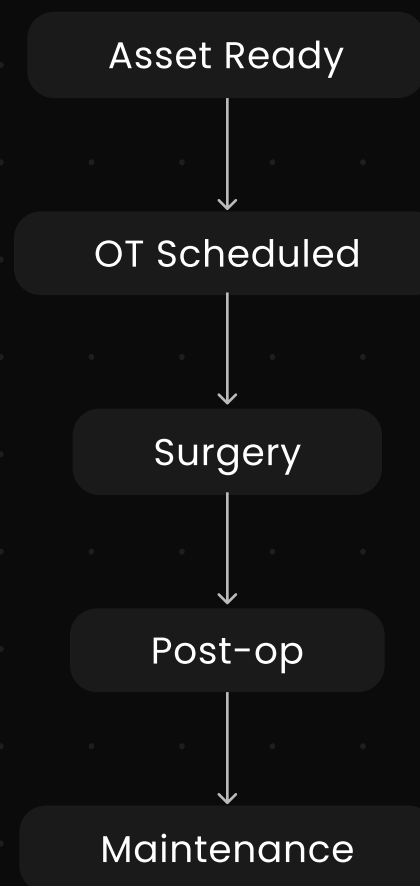

Log every item consumed during a procedure – medicines, consumables, implants. Inventory deducted automatically. Nothing unaccounted for.

Sanitation Workflow

Built-in sanitation stage between cases ensures OT rooms are cleared, cleaned, and ready – with a timestamp to prove it.

Instant Billing Handoff

The moment a case is completed, procedure charges are calculated and the invoice is submitted directly to billing. Zero delay. Zero manual entry.

Zeno Hosp connects OT, Inventory, and Billing into one flow.

Example of How It Actually Works

Step 1 — Surgery Planning

- OT booked
- Required consumables estimated
- Team assigned

Step 2 — During Surgery

- Consumables used are tracked in real time
- Implants linked to patient
- No manual recording later

Step 3 — Automatic Inventory Deduction

- Stock reduces instantly
- No hidden usage
- No post-entry manipulation

Step 4 — Billing Integration

- All used items directly pushed to billing
- No missed charges
- No dependency on staff memory

Step 5 — Profit Visibility

- Cost of surgery calculated
- Revenue vs expense clearly shown
- Department-wise insights

From surgery to billing
nothing is lost, nothing is missed.

FINANCE MANAGEMENT

Every Rupee. One Dashboard.

Real-time visibility into your hospital's complete financial health – revenue, expenses, vendor payments, and cash flow – all in one place.

Bank Accounts

Manage hospital bank accounts and track balances.

+ Add Account

Accounts (4)

ACCOUNT NAME	BANK	ACCOUNT NO	IFSC	TYPE	OPENING BALANCE	CURRENT BALANCE	ACTIONS
Pharmacy Cash	Pharmacy POS Cash	-	-	CASH	₹20,000	₹20,000.00	
Billing Cash	IPD & OPD Cash	-	-	CASH	₹2,40,000	₹2,40,000.00	
IDFC First Bank	Pharmacy Account	5003402324231	IDFC000321	CURRENT	₹20,00,000	₹20,00,000.00

Bank Accounts

Connect multiple bank accounts and track your total balance in real time. See money in and money out per account – no more switching between banking portals.

Cash Flow Overview

Visual credits vs expenses chart across any date range. Spot revenue peaks, expense spikes, and cash gaps before they become problems.

ZenoFinance – Because running a hospital is also running a business.

Every Penny Matters

HMS Billing

Consolidated billing across every revenue stream – OPD consultations, IPD admissions, and Ambulance services – each tracked separately with full breakdowns.

Vendor Payments

Record and track every payment made to vendors – medicines, equipment, services. Know what's paid, what's pending, and what's overdue.

Vendor Ledger

Complete transaction history per vendor. Every invoice, payment, and outstanding balance – in one clean ledger. Dispute-ready at any time.

Daily Expenses

Log daily operational expenses – utilities, housekeeping, consumables, miscellaneous. Nothing slips through as an untracked cost.

HMS Billing

View and complete OPD & IPD patient billing from Finance.

PHARMACY MANAGEMENT

The Right Drug. The Right Patient. Every Time.

ZenoHosp Pharmacy connects directly to HMS prescriptions – so your pharmacy team always knows what to dispense, to whom, and when.

OPD Prescription Dispensing

Medicines prescribed during OPD consultations in HMS appear instantly in the pharmacy queue. No paper chits, no verbal relay – the prescription travels digitally from doctor's screen to pharmacy counter.

IPD & Ward Dispensing

Pending IPD prescriptions flow directly into the ward dispensing queue – oldest first. Patient, drug, dose, route, quantity, and prescribing doctor all visible. One click to dispense, stock updated instantly.

POS — OPD Counter Sales

Walk-in and OPD prescription sales handled at the counter via a clean point-of-sale interface. Bill generated instantly, stock deducted automatically.

Drug Master

Maintain a complete drug catalogue with names, dosage forms, and units. The single source of truth for every medicine dispensed across the hospital.

Stock Dashboard

Real-time pharmacy stock levels powered by ZenInventory. Every dispense updates stock instantly — no manual reconciliation, no end-of-day counting.

Sales Ledger

Complete record of every pharmacy transaction — OPD sales, IPD dispenses, quantities, values, and timestamps. Audit-ready at any time.

PEOPLE MANAGEMENT

Every Person Who Runs Your Hospital. One Place.

Doctors, nurses, admin staff, housekeeping, external consultants – ZenoPeople manages your entire workforce so your hospital runs like a team, not a collection of departments

Staff Directory

Complete profiles for every person in your hospital – full-time staff, part-time employees, and visiting consultants. Role, department, contact, and employment details – always up to date.

Payroll

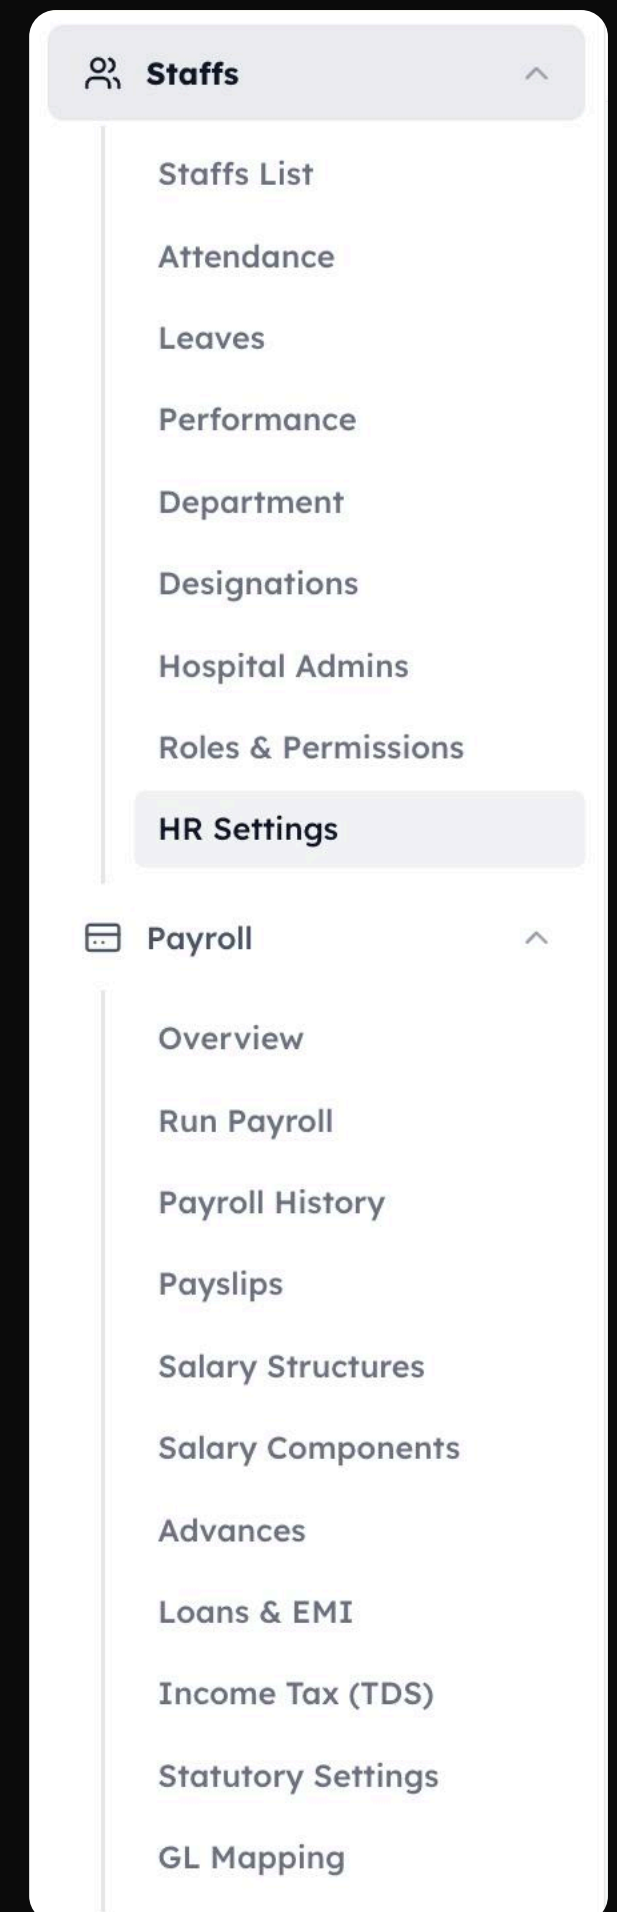

Run accurate payroll every month – factoring in attendance, leave, deductions, and allowances. Fully compliant with Indian statutory requirements including PF, ESI, and PT.

Attendance Tracking

Log and monitor daily attendance across all departments. Know who's in, who's absent, and who's on leave – in real time. No registers, no manual marking.

Leave Management

Staff apply for leave, managers approve or reject – all within the system. Leave balances calculated automatically. No more tracking leave on spreadsheets or WhatsApp.

Run your hospital on one OS.

Request a live demo. We'll walk you through every module tailored to your hospital's exact workflow from first patient to GST filing.
